EXPERIENCE

Chief Technology Officer

Storimake

Jun 2023 – Present

Madrid, Spain (Remote)

- Architected and shipped production AI agents using AWS Bedrock with LangChain orchestration, exposing internal capabilities through a custom MCP server with typed tool layers and Zod-validated contracts; the first agent served nearly 300 users in its first 3 days, replacing 15–20 minutes of manual handling per case.
- Lead engineering and drive product direction across the organization, balancing hands-on architecture with people management, hiring, 1:1s, growth coaching, and cross-functional alignment with Design, Operations, and Leadership.
- Led the migration from a mobile app to a web-based platform based on market research, redesigning services to ensure scalability and performance, reducing response times by up to 40% and cutting feature delivery times from months to days.
- Implemented a continuous deployment pipeline, taking the team from 2 releases per month to 10+ production deploys per week (a 20x increase), enabling tight feedback loops between engineering and customer-facing teams.

Principal Backend Engineer (part-time)

Dott

Feb 2024 – Jan 2025

Chicago, US (Remote)

- Led the design and implementation of scalable backend systems for an early-stage US startup, ensuring the platform was ready to absorb growth as user acquisition ramped.
- Designed an asynchronous AI pipeline on AWS that analyzed user-uploaded images and videos to detect their content, built to power an automatic video generation product and later feed context-aware cinematic video workflows.
- Developed and led R&D for automated video tools, enabling users and companies to convert pictures into cinematic stories through backend-driven workflows.

Co-Founder

The Crafters Lab

Jan 2021 – Aug 2023

Barcelona, Spain (Remote)

- Spearheaded business and technical strategy, driving digital transformation for businesses through end-to-end software solutions.
- Drove company growth by securing 5 clients in the first year, including 2 long-term collaborations and projects with Wefox, FlaixFM, and other leading agencies in Spain.
- Managed business and technical operations, aligning technology with client goals and generating ~€380k in cash flow during the first year with a team of 4.

Senior Software Engineer

Wefox

Mar 2020 – Dec 2021

Berlin, Germany (Remote)

- Developed an API that reduced the time-to-market for new insurance products from 6 months to 2 weeks, accelerating product launches and improving operational efficiency.
- Designed a strategy to transition from a monolithic architecture to modular components using Domain-Driven Design (DDD), helping spread the architecture across the engineering organization during a period of rapid hiring.
- Designed and implemented a testing strategy that increased test coverage by over 95%, significantly reducing bugs in production and improving overall system stability.
- Implemented a new CI/CD pipeline with the team, taking deployments from a 3-day manual process to minutes of automated execution.

Staff augmentation positions

Various companies

2015 – 2020

Spain

- Apartum.com - Barcelona, Spain
- Mobdala - Barcelona, Spain
- Cl3ver - Barcelona, Spain
- Huballin - Barcelona, Spain

TECHNICAL SKILLS

AI & LLM: AWS Bedrock, LangChain, MCP, tool-calling, Zod contracts, OpenAI API, Anthropic API

Languages & Frameworks: TypeScript, JavaScript, SQL, Node.js, Next.js, React, Tailwind CSS

Data, Cloud & DevOps: MySQL, PostgreSQL, MongoDB, Redis, AWS, Docker, GitHub Actions, Sentry, New Relic
